MUHAMMAD RIZKY PANGESTU

Backend Developer · Software Engineer

risky.mpangestu@gmail.com · +62 813-1500-6236 · Sukabumi, West Java, Indonesia · pangestu-k.github.io · github.com/pangestu-k · linkedin.com/in/muhammad-rizky-pangestu

SUMMARY

Backend-focused Software Engineer with 5+ years of professional experience building REST APIs, payment gateway integrations, background jobs, and internal platforms for products across education, fintech, and content industries. Working knowledge across the stack: Golang (Echo, Gin, Fiber), Laravel, and Node.js on the backend; React.js and Next.js on the frontend; PostgreSQL, MySQL, MongoDB, and SQL Server as databases. Recently focused on AI/LLM engineering — LLM agents, tool calling, text-to-SQL, LLM API development, and structured data extraction. Comfortable owning services end to end, from API design and integration to deployment on VPS with Nginx, Docker, and Dokploy.

TECHNICAL SKILLS

Languages: Golang, TypeScript, JavaScript, SQL, PHP

AI / LLM: LLM Agent, Tool Calling, Text-to-SQL, LLM API Development, Structured Data Extraction, AI-Assisted Development

Backend: Node.js, Express.js, Fiber, Gin, Hono, Echo, OpenAPI / Swagger, REST API, Laravel, Livewire

Databases: PostgreSQL, MongoDB, MySQL, SQL Server, Supabase

Frontend: React.js, Svelte, Next.js, Vite, TanStack, Tailwind CSS, Ant Design, shadcn/ui, Chakra UI

Cloud & DevOps: VPS Administration, Nginx, systemd, Dokploy, Docker, Self-hosted Deployment, Umami Analytics

WORK EXPERIENCE

Zegen Solusi Mandiri · *Full Stack Developer* — Jan 2023 – Present

Tangerang, Indonesia

- Develop software applications across frontend and backend for client projects, owning features from API design and integration through deployment.
- Work with Golang and Laravel services, React.js and Next.js frontends, and PostgreSQL databases across multiple client engagements.

Stack: Golang, Echo, Laravel, React.js, Next.js, PostgreSQL

PT Global 7 Teknologi · *Backend Developer* — May 2022 – Dec 2022

Depok, Indonesia

- Developed backend services for AYOSCAN, including transaction-related services and third-party integrations.
- Built REST APIs, background queues, and scheduled jobs supporting daily product operations.
- Integrated Xendit payment gateway and Zipay e-money, covering transaction callbacks and transaction data mapping.

Stack: Laravel, Node.js, PostgreSQL, MySQL, Xendit

PT Satu Visi Potensia · *Backend Developer* — Jun 2021 – May 2022

Jakarta, Indonesia

- Built REST APIs for Reach ASA and contributed to ASA Platform v2 and ASA Panel v3.
- Supported backend development for Coaching Tracker, an educational coaching product.

Stack: Laravel, Node.js, PostgreSQL, MySQL

CV IDS Consultant · *Backend Developer* — Sep 2020 – Dec 2020

Bogor, Indonesia

- Worked on backend development in an education technology environment supporting online learning.

Stack: PHP, Laravel, Node.js, MySQL, PostgreSQL

PROJECTS

Vtuberspace · vtuberspace.id · News Portal & Database

Community-run news portal covering the Indonesian VTuber scene, doubling as a crowd-sourced database of VTubers across Indonesia. Content is managed through Google Sheets synchronization, and the backend is built with clean architecture.

Stack: Golang, Echo, GORM, PostgreSQL, React.js, Next.js, Google Sheets Sync, Clean Architecture

Edura LMS · app.edunara.id · Learning Management System

Learning management system for schools, running academic activities end to end — from student registration and enrollment to grading and report card generation — with online payment support and containerized deployment.

Stack: Golang, Echo, GORM, PostgreSQL, React.js, Vite, TanStack, Docker, Dokploy, Payment Gateway

Bale Lelang · balelelang.btn.co.id · Auction Platform

Auction application for Bank BTN's asset auctions. Bidders browse assets, favorite the ones they like, mark their interest, and follow the flow through to purchase, powered by an event-driven microservice architecture.

Stack: Golang, Echo, GORM, PostgreSQL, Microservices, NATS, Debezium, React.js, Next.js, Ant Design

Pesanin · In Development · QR Restaurant Ordering

QR-code ordering application for restaurants. Guests order directly from their table while staff manage stock, tables, and floor availability in real time, from spotting empty tables to tracking incoming orders and payments.

Stack: Laravel, React.js, PostgreSQL, WebSockets, Payment Gateway

EDUCATION

STTI NIIT (I-Tech) *Bachelor's — Informatics Engineering* 2025 – 2026

Graduated 2026

STIE Dharma Negara *Bachelor's — Informatics Engineering* 2021 – 2025

SMK Wikrama 1 Garut *Vocational High School — Software Engineering* 2018 – 2021
